Education

Delhi University	*Jun 2021 – Jun 2024*
Bsc. (hons) Electronics, GPA: **8.1**	
Rajkiya Pratibha Vikas vidayalaya	*Apr 2020 – Jun 2021*
12th, Science, Percentage: **92.5**	

Experience

Frontend Developer Intern — *Remote*
Pinak Ventures — *Dec 2024 – Feb 2024*

- Built **React components** with **Redux-Thunks, and slices**, improving state management.
- Implemented **Firebase push notification system**, ensuring real-time alerts.
- Integrated **Google Login** and helped fix **session ID issues** from LAX settings for seamless authentication.
- Tech stack: **ReactJS, Redux Toolkit, Redux Thunk, React-Bootstrap and Tailwind CSS**.

Software Development Intern — *Remote*
Sudoyantra India — *Aug 2024 – Nov 2024*

- Developed **optimized, intuitive features** for dashboard, enhancing user-centric interactions and speed.
- Enabled **real-time data visualization** of robot statistics, management for organizations and users.
- Improved data handling and integration by **optimizing endpoints**.
- Tech stack: **VueJS, Tailwind CSS, MongoDB, Postgresql, Prisma**, **Typescript** and **Fastify**.

Projects

Interviewly - AI-Powered Interview *Live* ↗   *github.com/interviewly* ↗

- A platform for practicing interviews through mock interviews powered by the **Vapi ai voice assistent**.
- Features include **interview generation, voice interviews, detailed feedback**, **payment gateway**.
- Tools Used: **NextJS, Vapi AI, Gemini, Firebase, Tailwind css, Shadcn, Razorpay gateway**

Item Expiry Reminder *Live* ↗   *github.com/item-expiry* ↗

- Web app for personal item expiries and categorized item views (All, Fresh, Expired, Expiring Soon).
- Implemented **foreground and background push notifications** for expiration reminders.
- Tools Used: **ReactJS, Node.js, Express, MongoDB, JWT, Firebase, and Tailwind CSS**.

Watchspot - Native Movie App *Download apk* ↗   *github.com/watchspot* ↗

- A **React Native** app that uses the **TMDB API**, **Firebase**, **Gemini api** to showcase movies.
- Features include **movie search** via **Gemini API**, **bookmark movies** and **firebase auth**.
- Tools used: **React Native (Expo)**, TMDB API, **Tailwind CSS**, Gemini API and firebase

Technologies

Languages: JavaScript, C++, C, Python,

Technologies: NextJS, ReactJS, Javascript, Typescript, React-native, Vue3, Tailwind CSS, Bootstrap, Redux-toolkit, Redux-thunk, NodeJS, Postgresql, MongoDB, Prisma, Express, Git and Github

Competitions

Mobility Hackathon   *github.com/ratemystreet* ↗
RateMyStreet *Live* ↗   *Sept 2024*

- Collaborated with team to address walkability issues in Bangalore by developing a web app, *ratemystreet* ↗
- Designed a user-friendly interface for submitting street reviews and an interactive dashboard map for viewing ratings of specific streets, empowering users to choose safer routes.
- Tool used: **NextJS**, Google Auth, Tailwind CSS, shadcn ui
